Štefan Jarina

Linux & Solaris Specialist. Team Leader. Programming hobbyist.

SKILLSET

Unix Admin (SOLARIS)

Linux Admin (REDHAT)

Volume Managers (LVM/ZFS)

Scripting (BASH/Python/Ruby/Perl)

Backend Javascript (Node.js - REST APIs)

Elixir Language (in progress)

Databases (SQL)

Databases (MongoDB)

Reporting (Performance, KPIs)

English

WHAT IS MY STORY

Due to my interests in new technologies since my early years, I decided to join an IT company right after I left school. My very first job was a Monitoring Specialist at T-Systems Slovakia. While it was good for start of my professional career, I wanted to improve my knowledge in the Linux/Unix areas and after 3 years I applied for a 2nd level UNIX/Solaris Administrator position. I succeeded and got the pleasure to work with some amazingly skilled engineers who helped me to improve my knowledge in various areas. At that time I became interested in scripting and automation where a sysadmin position offered plenty of opportunities.

At the end of 2011 I decided to move to the Czech Republic and joined OKIN where I have been working as a Junior UNIX Administrator. Thanks to my past experience I was promoted to a Senior UNIX Administrator in just 9 months. During my senior position I developed several internal tools/scripts that are still actively used by the whole teams.

In 2014 my team leader left the company and as I had been her deputy for almost 2 years, I was promoted to Team Leader. I was managing the team for 1 and a half year and played a major role in transforming the team from 8x5 to 24x7 which was unbelievably difficult but was a very good challenge.

In October 2014 I was approached by the Managing Director of OKIN to help start a new project of Cloud Services. I have done over 400 interviews in first 6 months and helped to fill about 100 positions - doing all this while still running the Service Desk team.

In September 2015 we found my replacement team leader to take over from me for my old team and I became the Team Leader for Linux and DBA teams within this new project. I've built team from scratch to around 20 people in a 24x7 environment in Tier 1 & 2.

More about me

CERTS | RECOMMENDATIONS | TECHNOLOGIES

ITIL® Foundation Certificate in IT Service Management

EXIN, License 5416345.20423139

As of July 2015

Linux

HOME:

Use Archlinux for about 3 years now with XFCE DE.

WORK:

Worked with almost all flavors of Linux and UNIX where the most beloved one is Red-Hat(CentOS) and the most hated one is HP-UX.

Worked for almost 4 years with Solaris 10 and 11, so I have extensive knowledge in technologies like ZFS/SMF/LDOM ...

Coding

Started at school with HTML/PHP/jQuery/CSS, went through the scripting languages like Bash/Python/Perl/Ruby. Lately used a lot of Javascript at backend (Node.js). Sometimes I use Go Language for linux tool-smithing. Worked with Object oriented languages like Ruby. As of December 2015 I am learning Elixir as I find functional programming very interesting and also I am able to use the battle-proven Erlang VM (BEAM).

LinkedIn recommendations

It is my pleasure to recommend Stefan, which I know for just under two years. I'm constantly impressed with Stefan's attitude and productivity. He is both very bright and motivated. He's is a quick learner and has shown the ability to digest large volumes of information. Stefan also has the analytical skills to diagnose problems and devise viable solutions. He is very consistent in his work and tries to constantly improve all his skills. He is one of the best employees of the team whom I can rely on. I recommend him without reservations.

MY STATUS

I'M CURRENTLY EMPLOYED.

I'm working with interesting technologies within Cloud Environment for one of the biggest telco operator. (Verizon Communications)

I am always open for new opportunities though and in case of any interesting job profile, feel free to contact me.

Resume

My education and experience.

EXPERIENCE

Team Leader | Verizon Global Support Services Linux & DBA teams | Tier1 & Tier2

- Running team in 24/7 shift model
- Point of contact for escalations, customers, other teams**
- Building stable and efficient team, providing technical trainings for the colleagues

OKIN BPS

February 2014 - August 2015

Senior UNIX Systems Specialist

- Deputing Team Leader

OKIN BPS

September 2012 - January 2014

- Operation of UNIX/Solaris Systems technology
- installation, administration, patching, upgrading
- troubleshooting for 1st/2nd level tasks
- incident, change, problem management

- troubleshooting tasks (e.g.)
 - No IP connection
 - syslogd process configuration
 - high usage of space/swap space
 - various ZFS errors

- change tasks (e.g.)
 - FAN/DISK replacement
 - ILOM patching
 - middleware patching

- deployment tasks (e.g.)
 - installation of servers
 - upgrading OS
 - upgrading ILOM

In team I was dedicated to solve backup related issues.

Specialization in IBM Tivoli Storage Manager

- installing software to UNIX based systems, configure clients, solving issues with failed backups
- solving restore requests, managing schedules for backups
- communicating with Oracle to solve issue related to tape library

- used Python for system scripting and automation

Junior UNIX System Specialist

- Operation of UNIX/Solaris Systems technology
- installation, administration, patching, upgrading
- troubleshooting for 1st/2nd level tasks
- incident, change, problem management

OKIN BPS

November 2011 - August 2012

UNIX/Solaris System Administrator

- Operation of UNIX/Solaris technology
- installation, administration, patching, upgrading
- incident, change, problem management
- deployment (SOM@SAPv2 deployment tool)
- administration of 100 server per FTE (about 800 servers per team)

T-System Slovakia s.r.o.

November 2010 - November 2011

Monitoring Specialist

- communication with customer
- work with ticketing tool
- 12-hours shift work
- monitoring of thousands of servers, 1st level support
- for few customers I had 5min reaction time to create ticket in COSIMA and call technician
- communication with customer/engineer everyday in english via mail/phone or face-to-face

T-System Slovakia s.r.o.

July 2008 - October 2010

EDUCATION

Full Stack Web Development

Certificate in Full Stack Web Development, Computer Software Engineering

This is still in progress...

Free Code Camp

2015 - 2016

Electrical and Electronics Engineering

Subject of study was telecommunication technologies and programming.

I've obtained CCNA certificate, however it is expired as I went different path after the school.

Composite secondary school, Michalovce

2004 - 2008

Contact Me

I work in secured workspace so am unavailable for contact during EMEA business hours.
